

HARRIS GUNWORKS M-93 BOLT ACTION RIFLE

This very accurate 12.7mm (.50 Cal BMG) 10 round bolt action rifle is designed for and capable of engaging or destroying enemy targets at extreme ranges. The M-93 is durable, lightweight, affordable, and built to operate under the most hostile environments and will operate with all military ammunition, including API. The M-93 will withstand the most adverse weather conditions and is engineered for strength and durability. The receiver is available in either stainless or chrome molly steel, with black oxide finished surfaces. The M-93 has a recoil-reducing muzzle brake which limits muzzle rise and ground signature. Its Harris barrel is set free-floated, providing inherently outstanding accuracy. The M-93 is equipped with a graphite/fiberglass breakdown stock, and an adjustable cheek piece and 'toe pod' for firing stability. This rifle fires is capable of ½ MOA accuracy to 2.400 meters.
