HARRIS GUNWORKS M-96 SEMI-AUTOMATIC RIFLE

This very accurate 12.7mm (.50 Cal BMG) gas operated semi-automatic rifle is capable of engaging and destroying enemy targets at extreme ranges, with high rates of fire. The M-96 is durable, lightweight, and built to operate under the most hostile environments and will function with all new military ammunition, including API. The M-96 is engineered for strength and durability with finishes to withstand the most adverse weather conditions. It has a hard-chromed adjustable gas system which is field adjustable for reliable operation using all varieties of ammunition. The M-96 is a totally machined (no cast or stamped parts) of aircraft grade steel and aluminum. It is a low recoil rifle
